

User manual

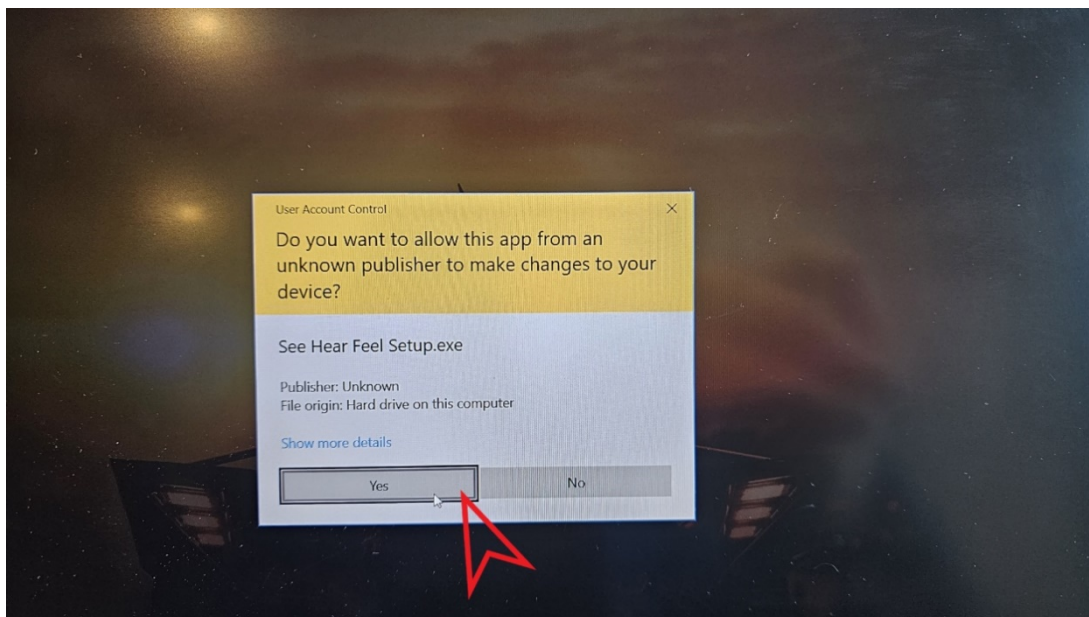

Part 1: Installation

Steps:

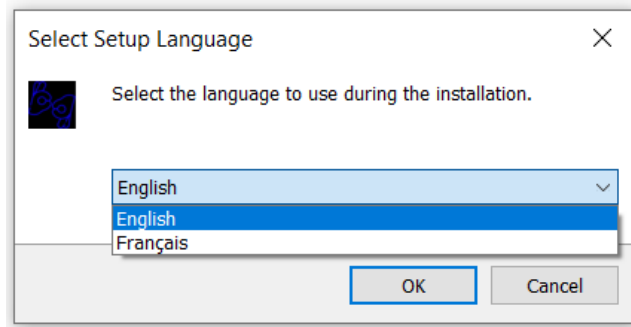

1. Download the Setup on your windows operating system.
2. Go to Your Downloads folder and locate the setup file, double click on it to open setup.

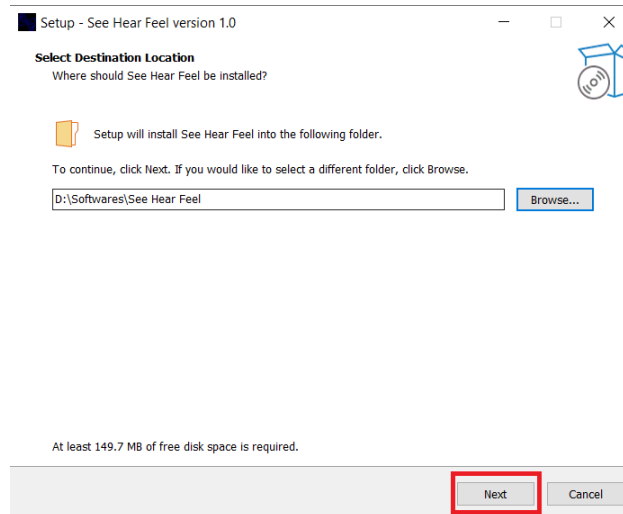

3. You will be prompted with a similar screen as shown in the figure below. Click Yes.

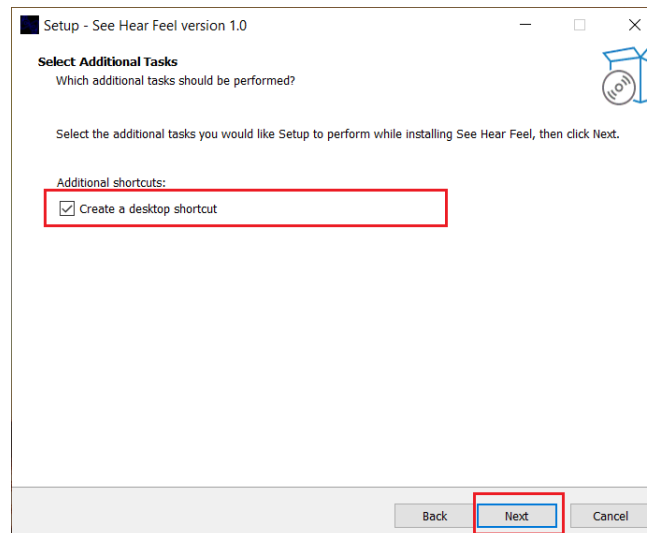

4. Select the language and click okay.

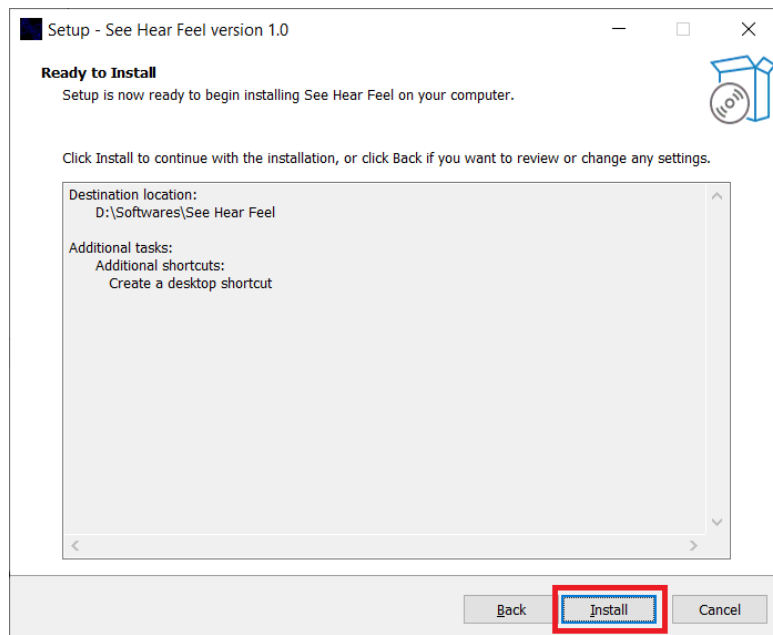

5. Browse and select your destination folder you want the software installed in and click on next.

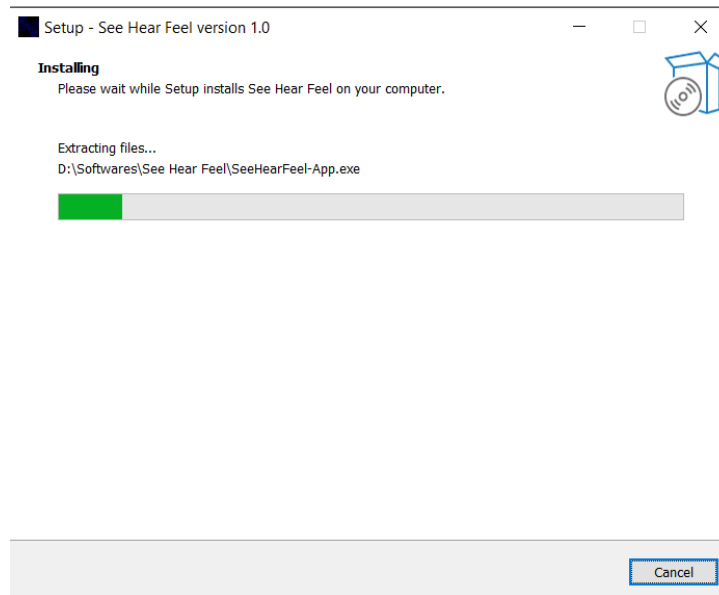

6. Check the box if you want to create a desktop shortcut and then click on next.

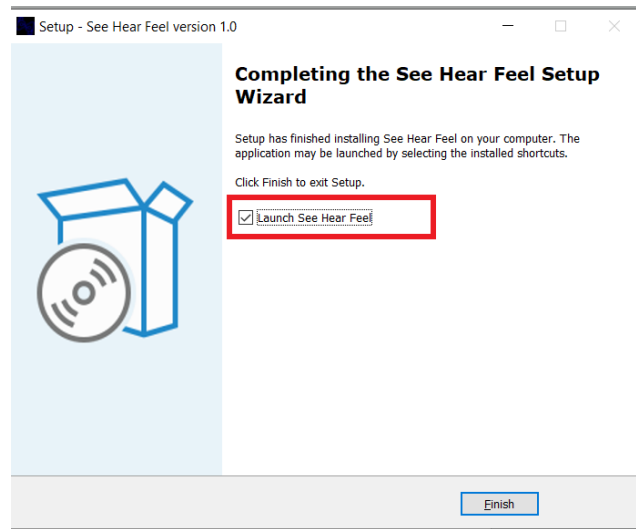

7. Click on Install.

8. Wait for setup to Install.

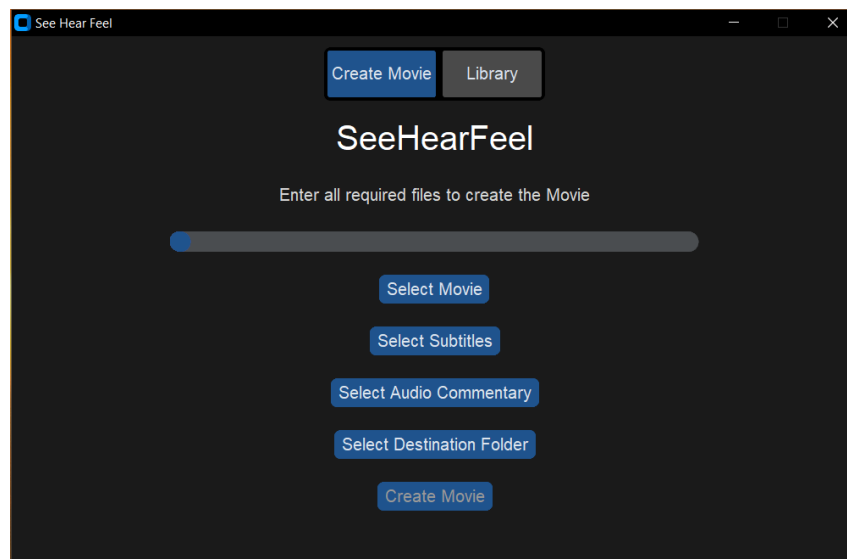

9. Once the installation is done, click on finish after you check the box 'Launch See Hear Feel' for launching the application.

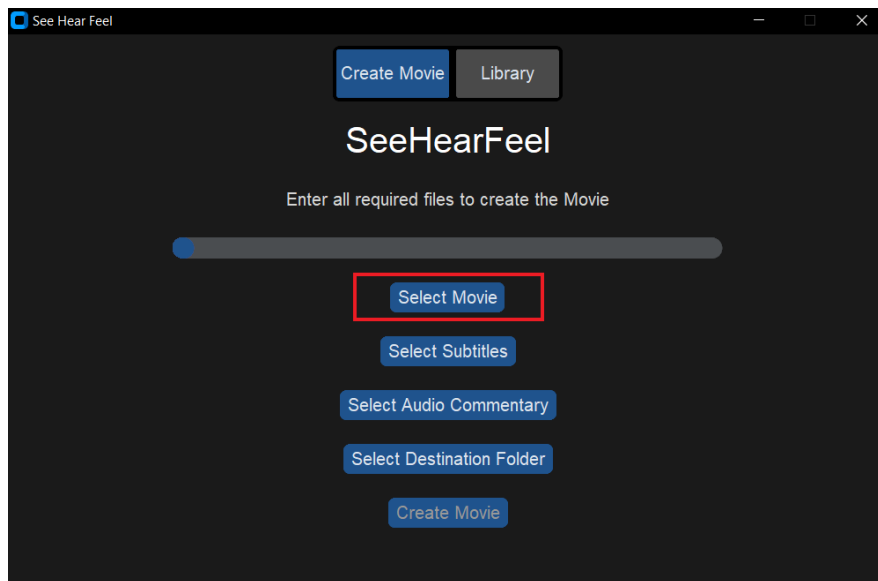

Part 2: Usage of Software

Steps:

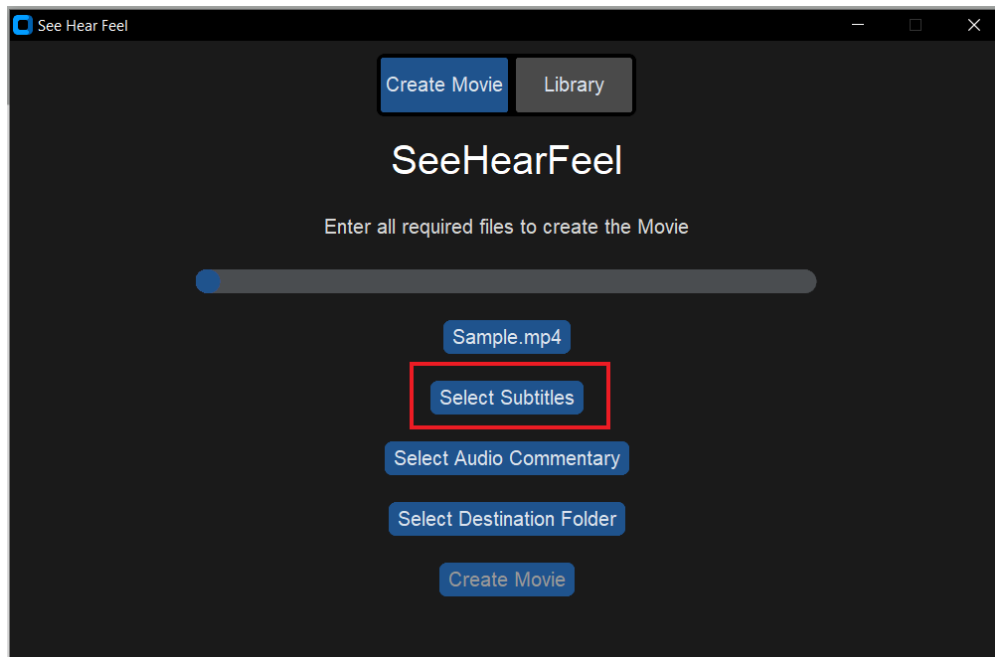

1. Open See Hear Feel application and below window will appear.

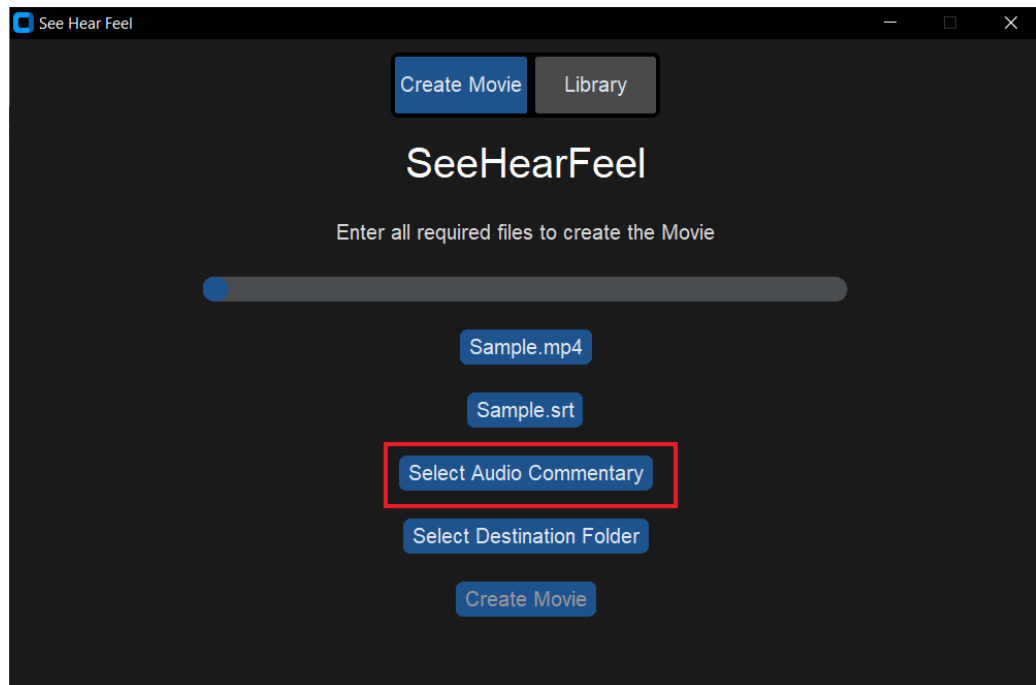

2. Select a Movie you want to make accessible for blind, deaf-mute people by clicking on the 'Select Movie' Button which will pop open a file explorer, browse, and select your movie. The movie should be in .mp4 format.

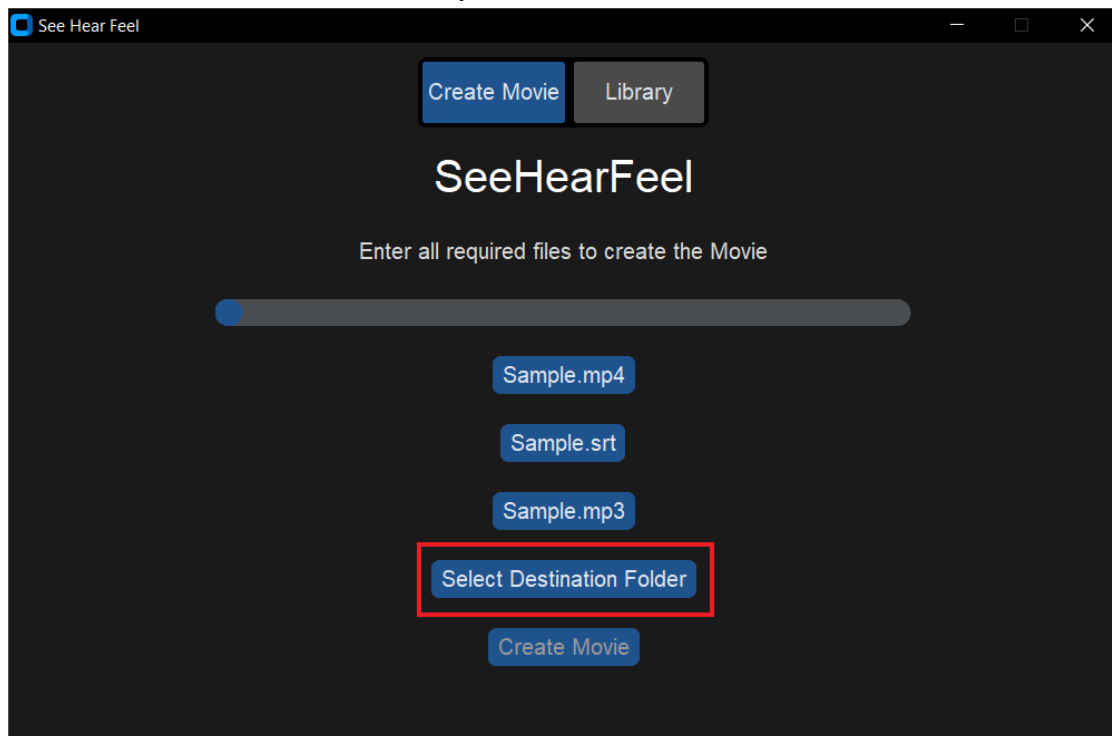

3. Select pre-synced subtitles for that movie you selected by clicking on Select Subtitles and browse and select the subtitles. The subtitles should be only in .srt or .vtt format

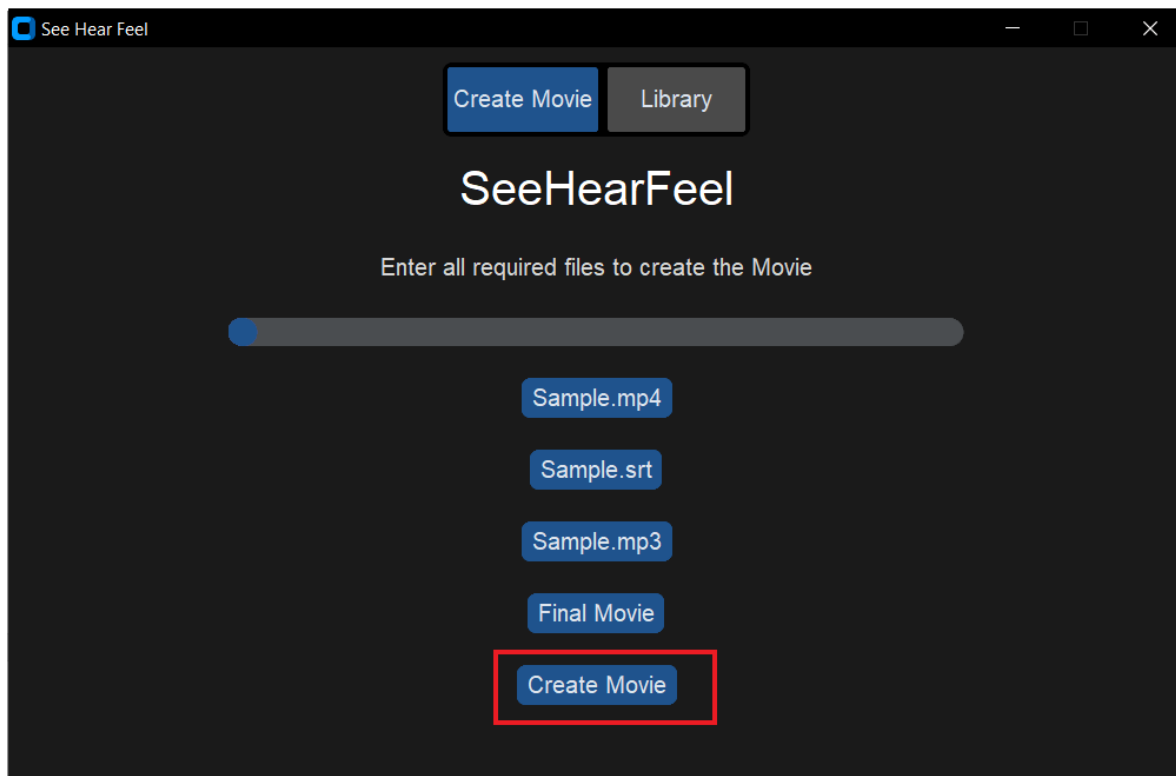

4. Select Audio Commentary or video description of the movie you made in only .mp3 format.

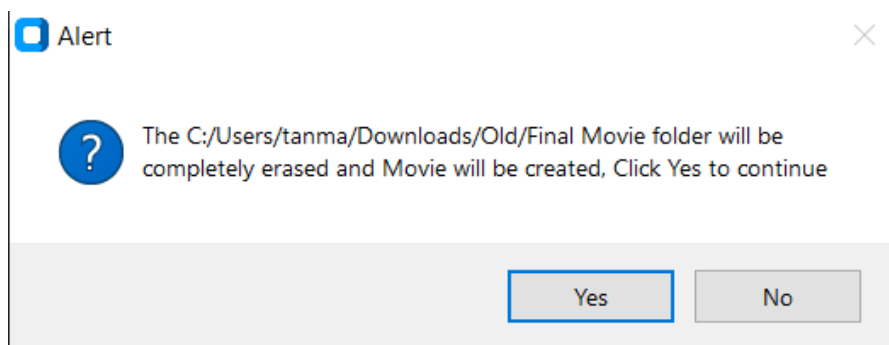

5. Select Destination Folder in which you want the movie.

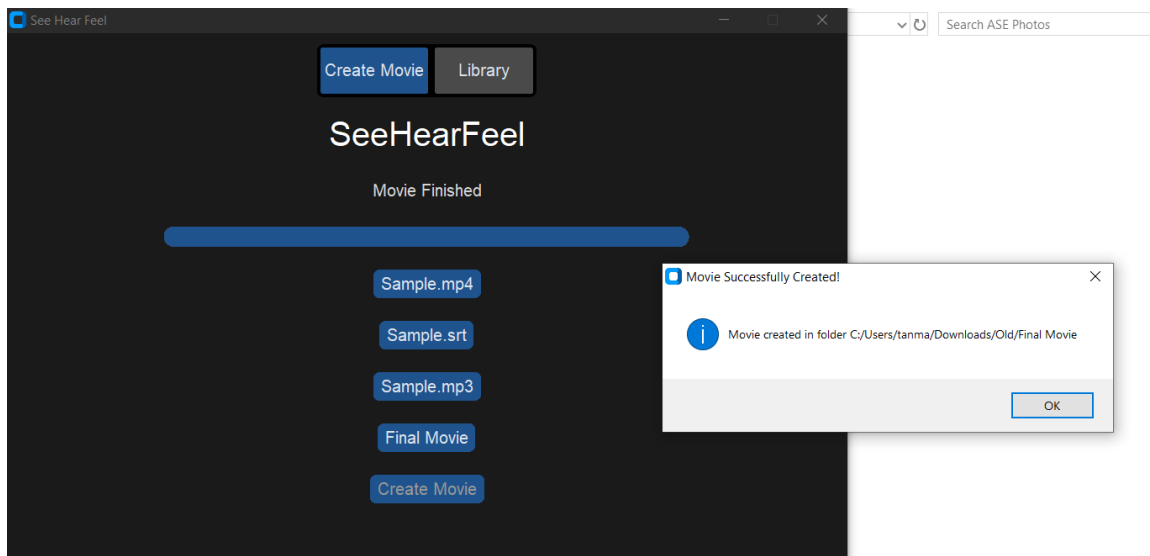

6. Click on Create Movie Button

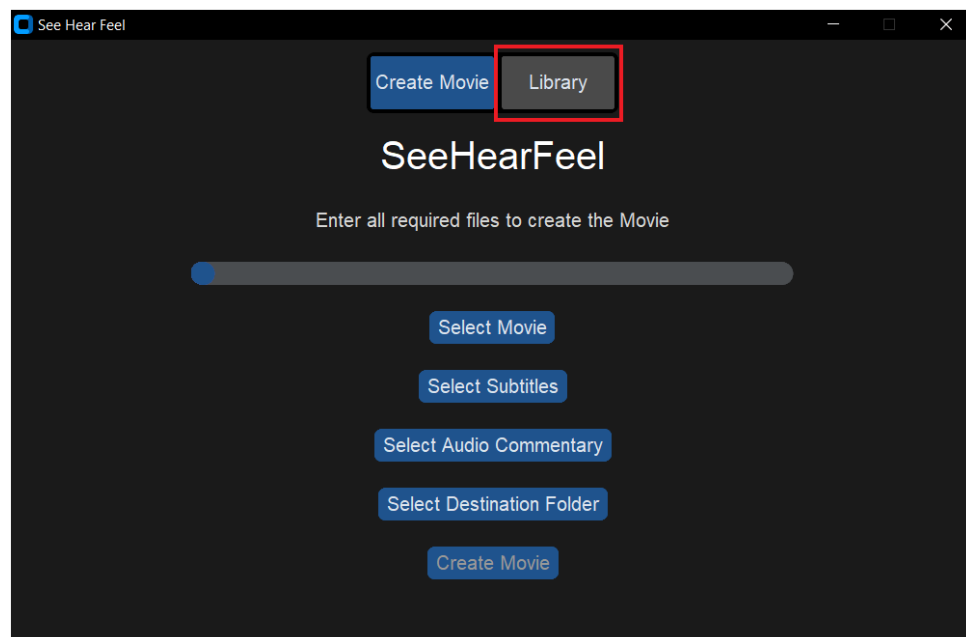

7. A prompt will pop up stating that all the files in your destination folder will be erased and the movie will be created in that folder. Select Yes Only if your Destination folder is empty and no files will be lost.

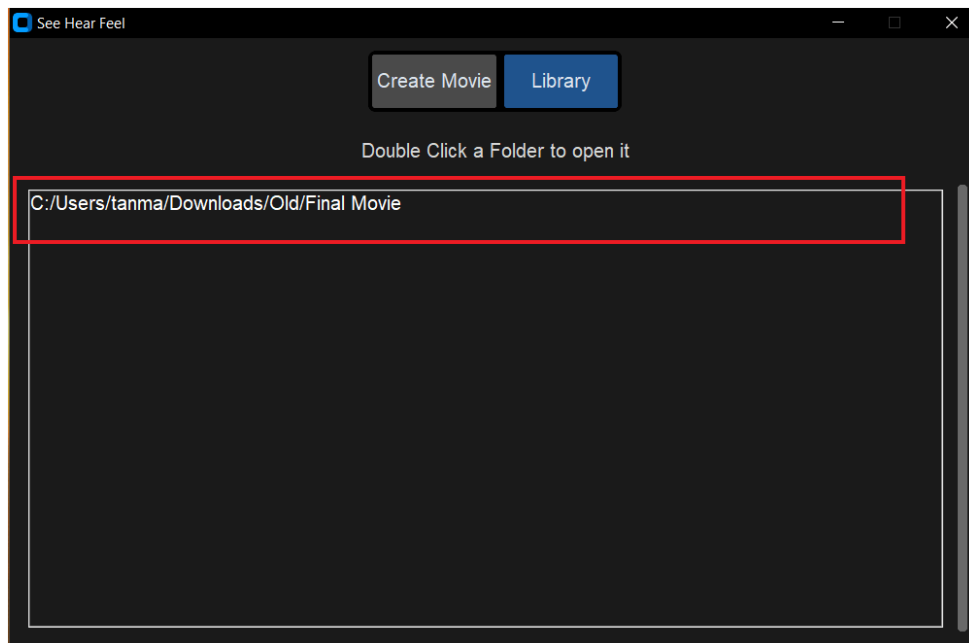

8. After Clicking Yes, Wait for Movie to be processed and after some time (varies on the length of your movie) the processing of the movie will be done, Click okay to click the alert box.

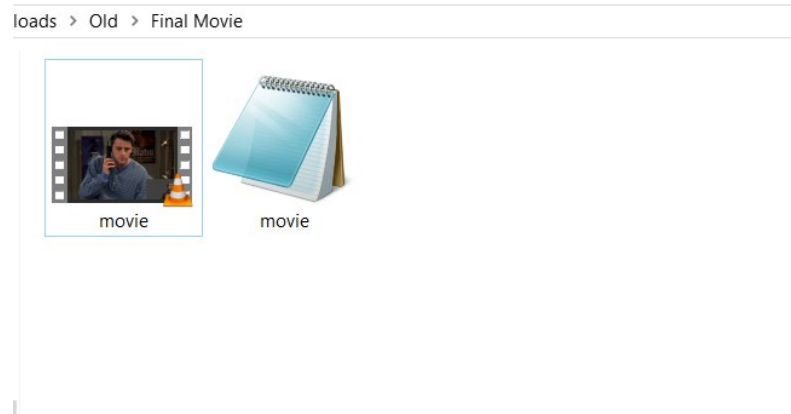

9. Click on Library.

10. Double click on the path to open it.

11. A file explorer showing with destination folder will show up.

12. Open Movie.mp4 to see your processed movie.
